Stay Kool let the Geeks Handle IT, We strive to give you the support you need when you need it.

**We'll be your tech team,  
so you can focus on  
what you do best & stop  
worrying about IT  
headaches**

When you sign up for one of our managed services packages, we work as an extension of your business so you can fully offload your IT needs to our team. We'll manage your needs for all of your office technology so you can gain peace of mind and so you can stay focused on growing your business.

## **What our team can do for you:**

### **Keep your computer and network protected from malware, ransomware, phishing and more**

We'll set your devices up with the most secure and efficient antivirus solutions, so you can browse the web and do your work without needing to worry about data risks or getting malware.

### **Ensure your employees never fall behind on updates or put your network at risk**

We proactively patch, update, and manage your applications and network so you can have peace of mind knowing that your whole team will always have their apps up to date.

### **Help you lock in more predictable pricing for your IT costs**

One key benefit of using managed services is you'll stop experiencing surprise IT costs, and be able to more regularly manage your technology expense. Also, our main goal is to prevent problems from ever happening, saving you money over time.

Visit our website at [www.jcstechit.com](http://www.jcstechit.com) for more information about our company's services.

Email us at [support@jcstechit.com](mailto:support@jcstechit.com) for inquiries.

# What our team can do for you:

## Help your approach to IT be proactive and preventative, not reactive

Maintaining technology in the workplace has become far more dynamic and complex. We will actively monitor your machines for errors, updates, hardware failure, security issues, and much more. We solve problems before you ever notice them.

## Respond to requests and issues remotely

One of the major benefits of working with a Managed Services Provider like us is that we can handle a majority of your requests and issues remotely. We use software programs to regularly update and maintain your devices and can launch remote sessions to help your team in real-time.

## Improve your overall IT security

We'll audit your network and device security, prevent breaches or vulnerabilities, data loss, and ensure your team is employing industry best practices in their daily operations.

## Set up and onboard new employees

We make it easy to onboard new employees from a tech perspective. We'll ensure they have all the necessary programs, credentials, and access to important accounts and networks.

## Implement cloud backups making sure your data is safe

Data loss is painful. Luckily it is also easily avoidable. We'll make routine backups of your files and data, and can easily help restore lost files in the event of an incident.

## Free up your IT staff to work on more strategic projects

If you have staff that helps you manage your IT, one great benefit of working for us is essentially unlocking a new employee in not time. We can handle the heavy lifting and allow for your team members to focus on new projects.

with your computer  
network

## Our services

Remote Monitoring & Support | Managed Backup & Resto | Network Management & Install | Microsoft Services

We all know that people are the foundation of any great organization. You wouldn't be where you are today without committed employees and loyal customers. How can you support your staff, retain customers, increase revenue, grow market share, and remain flexible in a changing corporate landscape? Responsive, secure, and advanced technology is the best investment you can make - now and for the future. Keeping up with technological advancements can be overwhelming, and you can't be an expert in everything. You need reliable and trustworthy advice, planning, and management services you and your people can depend on. We specialize in:

- Real-time solutions that build on your current business model and infrastructure
- High-level security structures that protect you and your customers
- User-focused tools and training that make implementing new systems easy
- Long-term management of systems and infrastructure

JC's focuses on your computer system so you can focus on your clients. Our experienced consultants work with you to guide your technology strategies, helping you align them with your business and process strategies. We provide strategic, architectural, operational, and implementation planning for all your IT needs.
